📄 SUMMARY

Senior Software Engineer with **7+ years of experience** specializing in full-stack web application development. Core expertise in backend architecture using **PHP, Laravel, and Node.js**, combined with modern frontend frameworks including **React.js, Vue.js, Next.js, and Inertia.js**. Proven track record in designing scalable RESTful APIs, executing complex third-party integrations, and optimizing relational databases (**MySQL**). Adept at delivering secure, high-performance web applications, writing clean maintainable code, and enhancing user experience across complex web platforms.

🎓 EDUCATION

Bachelor of Science in Computer Science
Global Institute
01/2015 – 12/2019 | Lahore

🏆 KEY ACHIEVEMENTS

Awards and Recognition

Achieved the Best Attendance award in 2024 and was recognized as Employee of the Quarter

🧩 STRENGTHS

Full-Stack Development

Proficient in building dynamic, user-centric web applications and integrating third-party APIs

💼 EXPERIENCE

14Digital

Team Lead

09/2025 – Present

- **Architected & Scaled Web Applications:** Designed, developed, and maintained full-stack enterprise web applications, custom CRM systems, and business management platforms using **PHP, Laravel, React.js, and Vue.js**.
- **AI & Automation Engineering:** Integrated **Google Gemini AI** and automated CV/resume parsing pipelines, streamlining recruitment workflows and reducing manual data extraction time by **40%**.
- **RESTful API & System Integration:** Engineered secure, high-performance **RESTful APIs** and integrated critical 3rd-party services to automate data flows across external business tools.
- **WhatsApp Meta & AI Agent Integration:** Integrated official **WhatsApp Meta Cloud API** with **AI-driven conversational workflows**, automating customer messaging, response handling, and lead management.
- **DevOps, CI/CD & Agile Delivery:** Executed deployments using **Git, CI/CD workflows, and Agile methodologies**, ensuring high-quality releases, zero downtime, and maintainable system documentation.
- **Code Quality & Maintenance:** Led code reviews, systematic debugging, and unit testing to uphold clean code standards while delivering long-term technical support and feature enhancements.

FRIDAY MEDIA GROUP

Senior FullStack Developer

09/2022 – 09/2025 | Lahore, Pakistan

- **High-Performance Architecture & Cloud Integration:** Engineered scalable web applications using **Laravel, React.js, and Node.js**, incorporating **Amazon S3** for secure, high-volume document storage and achieving a **30% improvement** in media processing speeds.

SKILLS

- Laravel
- Bootstrap
- Rest Api
- 3rd party Integration
- React js
- JQuery
- MongoDB
- OOP
- PHP
- SaaS Application
- MySQL
- Vue.js
- WebSockets
- Node.js
- Express.js
- GitHub Copilot
- Cursor AI
- Claude AI
- ChatGPT
- REST APIs
- SaaS Application
- WhatsApp Meta Integrations
- PostgreSQL
- Supabase
- Lovable

LANGUAGES

English

Advanced

- **Third-Party & Enterprise API Integrations:** Architected bi-directional calendar synchronization with **Google Calendar** and **Microsoft Graph API**, alongside secure employee data sync with the **HelloFriday HR platform**, reducing manual data entry by **50%**.
- **Real-Time Communication & Interactive UI:** Implemented real-time event broadcasting and interactive dashboards using **WebSockets**, resulting in a **25% increase** in user engagement and seamless multi-user collaboration.
- **Microsoft Office Add-in Development:** Developed a full-stack **Microsoft Office Add-in** utilizing **React.js** for the frontend and **Node.js** for the backend, extending enterprise app functionality directly into Microsoft Office products.
- **Auditing, Security & Compliance:** Built comprehensive logging, audit trail, and modular permission systems to track application events, ensuring **100% data traceability** and compliance with enterprise security standards.
- **Performance & UX Optimization:** Designed dynamic dashboards and modular UI components, optimizing frontend rendering times and delivering an intuitive user experience for high-traffic environments.

TECH PLUS

Senior Laravel Developer

06/2020 – 09/2022 | Lahore, Pakistan

- **Full-Stack Application Development:** Engineered scalable backend architectures and dynamic frontend interfaces using modern frameworks, resulting in a **25% improvement** in application load speed and system responsiveness.
- **FinTech & Payment Gateway Integration:** Seamlessly integrated **Stripe API** for secure online payment processing, implementing webhook handlers and error management that processed transactions with **99.9% uptime**.
- **Feature Development & Module Engineering:** Developed complex application modules, including dynamic calendar interfaces and real-time mobile messaging features, enhancing user interaction and engagement by **30%**.
- **Automated Testing & Code Reliability:** Implemented automated unit and integration testing frameworks, increasing test coverage to **80%+** and reducing production bugs and deployment errors by **35%**.
- **Documentation & Knowledge Sharing:** Authored comprehensive technical documentation, API specifications, and workflow guides, streamlining onboarding for new developers and accelerating team collaboration.

FR-Tech

Php/Laravel Developer

05/2019 – 05/2020 | Lahore, Pakistan

- **Cricgenix (Live Sports Streaming & Data Platform):** Architected and optimized the Cricgenix web application to fetch, parse, and render real-time sports data and live scores via high-throughput **RESTful APIs**, maintaining sub-second latency for dynamic user updates.
- **Loan Management & FinTech Engine:** Developed an enterprise Loan Management System automating loan request workflows, multi-level approvals, complex **EMI calculations**, and repayment tracking, reducing manual processing time by **40%**.
- **Financial Data Precision & Security:** Engineered automated amortization schedules and ledger tracking algorithms, ensuring **100% accuracy** in financial calculations and strict compliance with audit standards.
- **API Performance & Data Caching:** Implemented server-side caching and optimized API polling strategies for real-time sports feeds, reducing server load by **30%** during peak traffic events.
